Education

Rutgers University Honors College, School of Arts and Sciences — New Brunswick, NJ
Bachelor of Science in Computer Science and Mathematics — *Anticipated May 2027*

- **GPA**: 3.95/4.0 | SAT: 1580 | Dean's List. **Coursework**: Algorithms, Data Structures, Systems Programming, Computer Architecture, Stochastic Processes, Math Theory of Probability.

Software Engineering & Client Delivery

New York Life Insurance — New York, NY
Software Engineer Intern, TDAV Team — *May – Aug 2026*

- Delivered an AI text and voice agent for insurance claims, serving clients and 12,000 Customer Service Representatives on AWS with access to enterprise services, knowledge, and forms.
- Unified business logic from 13,000 documents across SharePoint, Confluence, Jira, the public site, and intranet into an enterprise knowledge base for AI and human users.

Rutgers Economics Labs — New Brunswick, NJ
President (formerly Research Director, Team Lead) — *Oct 2024 – Present*

- Lead quantitative engagements for NJDOL, NJDEP, NJBPU, Federal HUD, and the U.S. Census Bureau, translating stakeholder questions into Python/R analyses of large public datasets and decision-ready findings.
- Led five researchers end-to-end through an evaluation of New Jersey's Urban Enterprise Zone program, from scoping with NJDCA through econometric analysis and client delivery.

Scarlet Sync — New Brunswick, NJ
Founder — *Jan 2025 – Present*

- Built and shipped a Rutgers academic planning platform from 0 to 1 to thousands of users, iterating across degree, schedule, and course-planning workflows.
- Architected a Python/LLM data pipeline that reverse-engineers legacy university services and indexes 2,500+ classes and 500+ degree programs for real-time querying.
- Developed a production AI assistant with streaming tool-calling and grounded retrieval over schedules, degree plans, and user context across Web, ChatGPT, Claude, and iOS.

Samaritan Scout — Cranford, NJ
Full Stack Engineer Intern — *May 2023 – Aug 2025*

- Built an agentic extraction system over 100,000+ nonprofit websites using OpenAI and Gemini structured outputs, reducing manual data entry by over 90%.
- Developed a React, TypeScript, and PostgreSQL search product indexing 35,000+ volunteer opportunities, with semantic matching and hallucination filters.

Lykke — San Francisco, CA
Founding Software Engineer — *Sep 2025 – Present*

- Engineered production RAG and data workflows across MongoDB, Milvus, S3, Gemini Files API, and SSE, including citation events, token budgeting, and fallback paths.
- Built a distributed course-wiki engine with tenant-isolated background jobs using SQS, MongoDB leases, Redis rate limiting, and AWS ECS.

Technical Depth & Skills

Languages: Python, TypeScript/JavaScript, C++, Java, SQL, R, Bash | **Systems**: React, PostgreSQL, AWS, MongoDB, Redis, S3, ECS/SQS, Git
AI & Data: LLM workflows, RAG, agents, data pipelines, ontologies, PyTorch, Pandas, scikit-learn | **Awards**: 8090 AI Top Coder (5th), Rutgers Shark Tank (2nd and 3rd), ASA Fall Data Challenge (Top 3), NSF I-Corps
